

2. Assessment and diagnosis

What we said we would do

Provide accessible diagnosis services

Review the existing pathways to make sure they meet people's needs

Make sure people have the opportunity to provide feedback

Review post-diagnostic support

What we did

Commissioned a local diagnostic service for adults

Continued to deliver local diagnostic services for children and young people

What we still need to do

Work with Health to develop a sustainable service model for NY diagnostic services

Review information available before and after diagnosis
